JOYA™ TOUCH IS THE MULTI-PURPOSE DEVICE FOR RETAIL

Joya Touch is the multi-purpose device for use throughout retail that optimizes your ROI. The Joya Touch device is designed for use in Self-Shopping, Shop Floor, Access Control and more.

MULTIPLE DEVICES IN ONE

The Joya Touch device comes in two form factors: a handheld version resembling a smartphone and a pistol-grip version with a comfortable trigger. Joya Touch can be easily customized in several ways: upper case, front logo, battery cover and screen protector, both in colors and themes. This allows the retailer to choose either their corporate branding or other co-marketing logos.

WIRELESS CHARGING CRADLE

The Joya Touch device is charged using the industry's first wireless charging technology that eliminates the need for cleaning the contacts on the device and cradles. It radically reduces support costs and increases its life span.

The multi-bay cradle supports both handheld and pistol-grip models of the Joya Touch, ensuring the right configuration for every user/application. The retailer can choose between high density and front facing display installation, providing maximum flexibility.

USER INTERFACE

The user interface features a large touchscreen display along with Datalogic SoftSpot™ technology which allows users to choose the position of the soft trigger on the display.

BOOST AND FAST CHARGING

The Joya Touch device requires only 2.5 hours to recharge and the 'boost recharge' feature ensures 80 minutes of use after only 15 minutes of charging!

BLUETOOTH® WIRELESS TECHNOLOGY V4.0 - BLE AND BEACONS

The Joya Touch device supports Beacon technology for in-store localization. *Bluetooth* wireless technology and BLE can also be used to connect a wide range of peripherals such as printers, RFID readers, or other BT serial profile devices.
