# MICROLINE<sup>®</sup> 320/321 Turbo Series

# Legendary reliability, expanded head gap, and zero-tear capability for dedicated forms printing

The MICROLINE<sup>®</sup> 320/321 Turbo builds on the OKI Printing Solutions heritage of rugged reliability. This 9-pin printer is engineered to be tough enough for dedicated printing in the most demanding point-of-sale, automation and utility applications. It can easily run twice as long as most printers in its class. And it's economical enough to put wherever you need data on the spot.

#### Getting the job done, day in and day out

The ML320/321 Turbo puts the "work" in workstations for financial departments, wholesale or retail sales counters, even for harsh or warehouse or manufacturing environments. Its relentless performance comes from the design of its printhead; a light, strong, efficient motor; the longlasting rack-and-pinion drive system; and a protective, impact-resistant chassis.

The printer can accommodate multipart forms and stock that are up to twice as thick as those that fit our nearest competitor. The printhead delivers a stronger punch right to the last page of a 6-part form.

A patented optical sensor accurately positions the printhead for precise output, and the auto-tear feature accurately positions your continuous forms for a clean tear right at the perforation—eliminating wasted forms.

#### Accommodating your growing business

The ML320/321 Turbo can meet your needs today and in the future. It's exactly the same size as the legendary ML320/321 and it's compatible with virtually all custom and off-the-shelf software, making it the perfect replacement.

MICROLINE 320/321 Turbo Series: all the reliability and high performance you need.
